DETAILED ACTION

Claim Objections

1. Claims 14-16 are objected to because of the following informalities: Claims 14-16 improperly depends on claim 12. The examiner presumes that these claims depend on claim 13. Appropriate correction is required.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 9-12 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The "program" by itself lacks a statutory category -- process, machine, manufacture or composition of matter. See MPEP 2106 IV.8.1.(a) Functional Descriptive Material: "Data Structures" Representing Descriptive Material Per Se or Computer Programs Representing Computer Listings Per Se.

Allowable Subject Matter

4. Claims 1-8 and 13-16 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record such as Xue et al. (US 6,711,181 B1) provides a flag QPC for representing the number of dummy data added into the original packet, while the claimed subject matter is directed to coupling the additional packet having a length which is equal to the difference between the measured length and predetermined packet length in order to produce the second packet having the predetermined length:
